

Funding Strategy Statement

SECTION 1 INTRODUCTION

Overview

This Statement, originally prepared in accordance with Regulation 76A of the Local Government Regulations 1997, has been reviewed in accordance with Regulation 58 of the Local Government Pension Scheme Regulations 2013 (as amended) (the Regulations). The Statement describes the London Borough of Southwark's strategy, in its capacity as Administering Authority (the Administering Authority), for the funding of the London Borough of Southwark Pension Fund (the Fund).

As required by Regulation 58, the Statement has been reviewed (and where appropriate revised) having regard to guidance published by CIPFA. The statement has also been reviewed having regard to updated guidance published by CIPFA in September 2016, and not the original guidance issued in October 2012 as referred to in the LGPS Regulations at time of writing this Statement.

In preparing the FSS, the Administering Authority must also have regard to the supplementary statutory guidance issued by MHCLG (now DLUHC): Guidance on Preparing and Maintaining Policies on Review of Employer Contributions, Employer Exit Payments and Deferred Debt Agreements. The Administering Authority has also considered the Scheme Advisory Board's Guide to Employer Flexibilities for Administering Authorities and Employers in developing the FSS and associated policies in Section 7 of this Funding Strategy Statement.

Consultation

In accordance with Regulation 58, the Administering Authority has consulted such persons as it considers appropriate on the contents of this Statement and their views have been taken into account in formulating the Statement. However, the Statement describes a single strategy for the Fund as a whole.

In addition, the Administering Authority has had regard to the Fund's Investment Strategy Statement published under Regulation 7 of the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 (the Investment Regulations).

The Fund Actuary, Aon Solutions UK Limited, has also been consulted on the contents of this Statement.

Policy Purpose

The purpose of this Funding Strategy Statement is to document the processes by which the Administering Authority:

- establishes a clear and transparent fund-specific strategy that will identify how employer's pension liabilities are best met going forward.
- supports the regulatory requirement in relation to the desirability of maintaining as nearly constant primary employer contribution rates as possible.

- Ensures that the regulatory requirements to set contributions as to ensure the solvency and long-term cost efficiency of the Fund are met.
- takes a prudent longer-term view of funding the Fund's liabilities.

Links to investment policy set out in the Statement of Investment Principles

The Authority has produced this Funding Strategy Statement having taken an overall view of the level of risk inherent in the investment policy set out in the Investment Strategy Statement and the funding strategy set out in this Statement.

The assets that most closely match the liabilities of the Fund are fixed interest and index-linked Government bonds of appropriate term relative to the liabilities. The Fund's asset allocation as set out in the Investment Strategy Statement invests a significant proportion of the Fund in assets such as equities which are expected but not guaranteed to produce higher returns than Government bonds in the long term. The Administering Authority has agreed with the Fund Actuary that the Funding Target on the ongoing basis will be set after making some allowance for this higher anticipated return. However, the Administering Authority recognises that outperformance is not guaranteed and that, in the absence of any other effects, if the higher expected returns are not achieved the solvency position of the Fund will deteriorate.

The funding strategy recognises the investment targets and the inherent volatility arising from the investment strategy, by being based on financial assumptions which are consistent with the expected return on the investments held by the Fund, and by including measures that can be used to smooth out the impact of such volatility.

The Administering Authority will continue to review both documents to ensure that the overall risk profile remains appropriate including, where appropriate, commissioning asset liability modelling or other analysis techniques.

Review of this Statement

The Administering Authority undertook its latest substantive review of this Statement in January 2023.

The Administering Authority will formally review this Statement as part of the triennial valuation following the 31 March 2022 valuation, currently expected to be as at 31 March 2025, unless circumstances arise which require earlier action.

The Administering Authority will monitor the funding position of the Fund on an approximate basis at regular intervals between valuations, and will discuss with the Fund Actuary whether any significant changes have arisen that require action.

SECTION 2 AIMS AND PURPOSE OF THE FUND

Purpose of the Fund

The purpose of the Fund is to invest monies in respect of contributions, transfer values and investment income in order to:

- produce a Fund to pay Scheme benefits, transfer values, costs, charges and expenses as defined in the LGPS Regulations and as required in the Investment Regulations over the long term and in so doing;
- to smooth out the contributions required from employers over the long term.

Aims of the Fund

The main aims of the Fund are:

- a) To comply with Regulation 62 of the Regulations** and specifically to:
- adequately fund benefits to secure the Fund's solvency and long term cost efficiency, which should be assessed in light of the risk profile of the Fund and Employers
 - while taking account of the desirability of maintaining as nearly constant primary employer contribution rates as possible (and subject to the Administering Authority not taking undue risks) at reasonable cost to the taxpayers, scheduled (as defined in Part 1 or deemed employers as per Part 4 of Schedule 2 of the LGPS Regulations), resolution (as defined in Part 2 of Schedule 2 of the LGPS Regulations), and admitted bodies
 - enable overall employer contributions to be kept as constant as possible (and subject to the Administering Authority not taking undue risks) at reasonable cost to the taxpayers, scheduled, resolution and admitted bodies

The Administering Authority recognises that the requirement to keep employer total contribution levels as nearly constant as possible can run counter to the following requirements:

- the regulatory requirement to secure solvency, which should be assessed in light of the risk profile of the Fund and risk appetite of the Administering Authority and employers
- the requirement that the costs should be reasonable to Scheduled Bodies, Admission Bodies, other bodies and to taxpayers (subject to not taking undue risks), and
- maximising income from investments within reasonable risk parameters (see later)

Producing low volatility in the funding position requires material investment in assets which 'match' the employer's liabilities. In this context, 'match' means assets which behave in a similar manner to the liabilities as economic conditions alter. For the liabilities represented by benefits payable by the Local Government Pension Scheme, such assets would tend to comprise gilt edged investments.

Other classes of assets, such as stocks and property, are perceived to offer higher long term rates of return, on average, and consistent with the requirement to maximise the returns from investments within reasonable risk parameters, the Administering Authority invests a substantial proportion of the Fund in such assets. However, these assets are more risky in nature, and that risk can manifest itself in

volatile returns over short term periods, and a failure to deliver anticipated returns in the long term.

This short term volatility in investment returns can produce a consequent volatility in the measured funding position of the Fund at successive actuarial valuations, with knock on effects on employer contribution rates. The impact on employer rates can be mitigated by use of smoothing adjustments at each valuation.

The Administering Authority recognises that there is a balance to be struck between the investment policy adopted, the smoothing mechanisms used at valuations, and the resultant stability of employer contribution rates from one valuation period to the next.

The Administering Authority also recognises that the position is potentially more volatile for Admission Bodies with short term contracts where utilisation of smoothing mechanisms is less appropriate.

b) To ensure that sufficient resources are available to meet all liabilities as they fall due.

The Administering Authority recognises the need to ensure that the Fund has, at all times, sufficient liquid assets to be able to pay pensions, transfer values, costs, charges and other expenses. It is the Administering Authority's policy that such expenditure is met, in the first instance, from incoming employer and employee contributions to avoid the expense of disinvesting assets. The Administering Authority monitors the position on a monthly basis to ensure that all cash requirements can be met.

c) To manage employers' liabilities effectively.

The Administering Authority seeks to ensure that all employers' liabilities are managed effectively. In a funding context, this is achieved by seeking regular actuarial advice, ensuring that employers are properly informed and consulted, and through regular monitoring of the funding position and the outlook for employers' contributions.

d) To maximise the income from investments within reasonable risk parameters.

The Administering Authority recognises the desirability of maximising investment income within reasonable risk parameters. Investment returns higher than those available on Government stocks are sought through investment in other asset classes such as stocks and property. The Administering Authority ensures that risk parameters are reasonable by:

- Complying with any restrictions set out in the Investment Regulations.
- Restricting investment to asset classes generally recognised as appropriate for UK pension funds.
- Analysing the potential volatility and absolute return risks, and funding risk represented by those asset classes in collaboration with Investment Advisors and Fund Managers, the Fund Actuary and the London CIV and ensuring that they remain consistent with the risk and return profiles anticipated in the funding strategy.

- Limiting concentration of risk by developing a diversified investment strategy.
- Monitoring the mis-matching risk that the investments do not move in line with the Fund's liabilities.

SECTION 3 RESPONSIBILITIES OF THE KEY PARTIES

The three parties whose responsibilities to the Fund are of particular relevance are the Administering Authority, the individual employers and the Fund Actuary.

Their key responsibilities are as follows:

Administering Authority

The Administering Authority will:

- Administer the Fund
- Collect employer and employee contributions, investment income and other amounts due to the Fund as stipulated in LGPS regulations and, as far as the Administering Authority is able to, ensure these contributions are paid by the due date.
- Pay from the Fund the relevant entitlements as stipulated by the Regulations
- Invest surplus monies in accordance with the Investment Regulations and the Fund's Investment Strategy Statement.
- Ensure that cash is available to meet liabilities as and when they fall due.
- Manage the valuation process in consultation with the Fund's Actuary
- Ensure it communicates effectively with the Fund Actuary to:
 - Agree timescales for the provision of information and provision of valuation results
 - Ensure provision of data of suitable accuracy
 - Ensure that the Fund Actuary is clear about the content of the Funding Strategy Statement
 - Ensure that participating employers receive appropriate communication throughout the process
 - Ensure that reports are made available as required by relevant guidance and Regulations
 - Provide information required by the Government Actuary's Department in relation to Section 13 of the Public Service Pensions Act 2013
- Prepare and maintain an Investment Strategy Statement and a Funding Strategy Statement after due consultation with persons the Administering Authority considers appropriate, and amend these two documents if required.
- Monitor all aspects of the Fund's performance and funding.
- Effectively manage any potential conflicts of interest arising from its dual role as both Administering Authority and Scheme Employer.
- Enable the Local Pension Board to review the valuation process as set out in their terms of reference.
- Take measures as set out in the regulations to safeguard the fund against the consequences of employer default.
- Exercise discretions within the regulatory framework, taking into account the cost of decisions.

- Ensure consistent use of policies relating to revising employer contributions between formal valuations, entering into deferred debt agreements and spreading exit payments, and ensure the process of applying those policies is clear and transparent to all fund employers

Individual Employers

Individual Employers will:

- Deduct contributions from employees' pay correctly.
- Pay all ongoing contributions, including their employer's contribution as determined by the Fund Actuary and where relevant set out in the rates and adjustment certificate, promptly by the due date (including contributions due under a Deferred Debt Agreement).
- Develop a policy on certain discretions and exercise those discretions as permitted within the regulatory framework.
- Pay for additional membership or pension, augmentation, early release of benefits or other one off strain costs (including in relation to ill health retirements) in accordance with agreed arrangements.
- Notify the Administering Authority promptly of all changes to membership, or other changes with affect future funding.
- Notify the Administering Authority promptly of possible or intended changes that could affect the basis of participation in the Fund which affect future funding.
- Note and if desired respond to any consultation regarding the Funding Strategy Statement, the Investment Strategy Statement or other policies.
- Pay any exit payments as required in the event of their ceasing participation in the Fund
- Be aware that responsibility for compensatory added years, which the Administering Authority pays on behalf of the employer as a paying agent, lies with the employer which awards and is recharged for the cost of compensatory added years;

Fund Actuary

The Fund Actuary will prepare advice and calculations and provide advice on:

- Funding strategy and the preparation of the Funding Strategy Statement
- Actuarial valuations including the setting of employers' contribution rates and issue of a Rates and Adjustments Certificate, after agreeing assumptions with the Administering Authority and having regard to the Funding Strategy Statement and the LGPS Regulations.
- Any decision by the Administering Authority to put in place a Deferred Debt Agreement under Regulation 64(7B) or spread an exit payment under Regulation 64B.
- Bulk transfers and individual benefit-related matters such as pension strain costs, compensatory added years costs, etc.
- Valuations of exiting employers.
- Bonds and other forms of security for the Administering Authority against the financial effect on the Fund of Employers' default.

Such advice will take account of the funding position and Funding Strategy Statement of the Fund, along with other relevant matters.

The Fund Actuary will assist the Administering Authority in assessing whether employer contributions need to be revised between actuarial valuations as permitted or required by the Regulations, in particular in relation to any review of contributions between triennial valuations under Regulation 64A.

The Fund Actuary will ensure that the Administering Authority is aware of any professional guidance requirements which may be of relevance to his or her role in advising the Administering Authority.

SECTION 4

FUNDING TARGET, SOLVENCY AND NOTIONAL SUB FUNDS

Risk based approach

The Fund utilises a risk based approach to funding strategy.

A risk based approach entails carrying out the actuarial valuation on the basis of the assessed likelihood of meeting the funding objectives, rather than relying on a 'deterministic' approach which gives little idea of the associated risk. In practice, three key decisions are required for the risk based approach:

- what the Solvency Target should be (the funding objective - where the Administering Authority wants the Fund to get to),
- the Trajectory Period (how quickly the Administering Authority wants the Fund wants to get there), and
- the Probability of Funding Success (how likely the Administering Authority wants it to be now that the Fund will actually achieve the Solvency Target by the end of the Trajectory Period).

These three choices, supported by risk modelling carried out by the Fund's Actuary, define the discount rates (investment return assumption) to be adopted and, by extension, appropriate levels of contribution payable. Together they measure the riskiness (and hence also the degree of prudence) of the funding strategy.

These three terms are considered in more detail below.

Solvency Target and Funding Target

Solvency and 'funding success'

The Administering Authority's primary aim is long-term solvency. Accordingly, employers' contributions will be set to ensure that the liabilities can be met over the long term, using appropriate actuarial assumptions. The Solvency Target is the amount of assets which the Fund, having taken advice from the Fund Actuary, wishes to hold at the end of the Trajectory Period (see later) to meet this aim.

The Fund is deemed to be solvent when the assets held are equal to or greater than of the Solvency Target, where the Solvency Target is the value of the Fund's liabilities evaluated using appropriate methods and assumptions.

The Administering Authority believes that its funding strategy will ensure the solvency of the Fund because employers collectively have the financial capacity to increase employer contributions should future circumstances require, i.e. if the funding level falls below 100%.

For secure tax raising Scheduled Bodies and Admission Bodies with guarantors of sound covenant agreeing to subsume assets and liabilities following exit, the Solvency Target will use appropriate actuarial methods and assumptions that are believed appropriate in the long term for those Bodies. For the 2022 valuation the Solvency Target will be set using an assumed rate of return of 2% in excess of the assumed long term annual increase in the Consumer Prices Index, which is intended to be a prudent outperformance assumption based on assumed future asset holdings.

For Admission Bodies and other bodies whose liabilities are expected to be orphaned following exit, the required Solvency Target will be set at a more prudent level dependent on circumstances. For most such bodies, the chance of achieving

solvency will be set commensurate with assumed investment in an appropriate portfolio of Government index linked and fixed interest bonds after exit.

For deferred employers it is expected that the Solvency Target will be set by considering the valuation basis which would be adopted once the Deferred Debt Agreement (DDA) ends.

Probability of Funding Success

The Administering Authority deems funding success to have been achieved if the Fund, at the end of the Trajectory Period, has achieved the Solvency Target. The Probability of Funding Success is the assessed chance of this happening based on the level of contributions payable by members and employers, and asset-liability modelling carried out by the Fund Actuary.

Consistent with the Administering Authority's aim of enabling employers' contribution levels to be kept as nearly constant as possible, the required chance of achieving the Solvency Target at the end of the relevant Trajectory Period for each employer or employer group can be altered at successive valuations within an overall envelope of acceptable risk.

The Administering Authority will not permit contributions to be set following a valuation that have an unacceptably low chance of achieving the Solvency Target at the end of the relevant Trajectory Period.

Trajectory Periods

The Trajectory Period in relation to an employer is the period between the valuation date and the date on which solvency is targeted to be achieved.

Maintaining a stable Trajectory Period avoids undue volatility when setting long term assumptions for the Fund, where the Administering Authority would in ideal circumstances look to reduce the Recovery Period over time in order to achieve full funding. A Trajectory Period of 25 years will be used for the valuation at 31 March 2022.

Funding Target

The Funding Target is the amount of assets which the Fund needs to hold at the valuation date to pay the liabilities at that date as indicated by the chosen valuation method and assumptions. It is a product of the actuarial valuation exercise and is not the same as the Solvency Target. It is instead the product of the data, chosen assumptions, and valuation method. The valuation method including the components of Funding Target, future service costs and any adjustment for the surplus or deficiency simply serves to set the level of contributions payable, which in turn dictates the chance of achieving the Solvency Target at the end of the Trajectory Period (defined below).

The discount rate, and hence the overall required level of employer contributions, has been set at the valuation at 31 March 2022 such that the Fund Actuary estimates there an 83% chance that the Fund would reach or exceed its Solvency Target after 25 years.

Consistent with the aim of enabling employers' contribution levels to be kept as nearly constant as possible:

- Primary contribution rates are set by use of the Projected Unit valuation method for most employers. The Projected Unit method is used in the actuarial valuation to determine the cost of benefits accruing to the Fund as

a whole and for employers who continue to admit new members. This means that the contribution rate is derived as the cost of benefits accruing to employee members over the year following the valuation date expressed as a percentage of members' pensionable pay over that period.

- For employers who no longer admit new members, the Attained Age valuation method is normally used. This means that the contribution rate is derived as the average cost of benefits accruing to members over the period until they die, leave the Fund or retire.
- For admission bodies the Administering Authority will take into account the potential for participation to cease, the potential timing of such exit, and any likely change in investment strategy regarding the assets held in respect of the admission body's liabilities at the date of exit.

For all funding targets an allowance will be made for future pension increases and revaluation of pension accounts using an assumption for future CPI increases which is derived consistently with the modelling underpinning the discount rates. At the 2022 valuation this is a long-term best estimate CPI assumption of 2.3% p.a. Allowance may also be made for any short-term inflationary pressures where this is considered appropriate and prudent. At the 2022 valuation an adjustment of 10% will be added to the liabilities. This adjustment will be reviewed at future calculation dates to ensure it remains appropriate in light of prevailing market conditions.

Application to different types of body

Some comments on the principles used to derive the Solvency and Funding Target for different bodies in the Fund are set out below.

Scheduled Bodies and certain other bodies of sound covenant

The Administering Authority will adopt a general approach in this regard of assuming indefinite investment in a broad range of assets of higher risk than low risk assets for secure tax raising Scheduled Bodies whose participation in the Fund is considered by the Administering Authority to be indefinite and certain other bodies which are long term in nature i.e. Admission Bodies with a subsumption commitment from such Scheduled Bodies. This is known as the scheduled and subsumption body funding target.

For other Scheduled Bodies the Administering Authority may without limitation, take into account the following factors when setting the funding target for such bodies:

- the type/group of the employer
- the business plans of the employer;
- an assessment of the financial covenant of the employer;
- any contingent security available to the Fund or offered by the employer such as a guarantor or bond arrangements, charge over assets, etc.

Admission Bodies falling under London Borough of Southwark policy

London Borough of Southwark, as an employer, introduced an admissions policy following the actuarial valuation at 31 March 2010 whereby the pensions risk of new admission bodies is underwritten by London Borough of Southwark, and in return the employer's contribution is fixed at the rate at initial entry to the Fund (potentially subject to certain provisos). The Administering Authority has agreed that these

contribution rates can be reflected in the actuarial valuation and set out in the Rates and Adjustment Certificate.

London Borough of Southwark subsequently extended this approach to admission bodies which joined the Fund prior to the introduction of this admissions policy with contributions payable at a fixed rate as determined as part of the 31 March 2013 valuation process.

Admission Bodies and certain other bodies whose participation is limited and not subject to a guarantee

For Admission Bodies, bodies closed to new entrants and other bodies whose participation in the Fund is believed to be of limited duration through known constraints or reduced covenant, and for which no access to further funding would be available to the Fund after exit the Administering Authority will have specific regard to the potential for participation to cease (or to have no contributing members), the potential timing of such exit, and any likely change in notional or actual investment strategy as regards the assets held in respect of the body's liabilities at the date of exit (i.e. whether the liabilities will become 'orphaned' or whether a guarantor exists to subsume the notional assets and liabilities). This is known as the (ongoing) orphan admission bodies funding target. It is not the same as the exit basis.

At the 2022 valuation no employers fell into this category.

Full Funding

The Fund is deemed to be fully funded when the assets held are equal to or greater than the Funding Target, where the funding target is assessed based on the sum of the appropriate funding targets across all the employers / groups of employers. When assets held are greater than this amount the Fund is deemed to be in surplus, and when assets held are less than this amount the Fund is deemed to be in deficiency

Other Aspects of Funding Strategy

Recovery Periods

Where a valuation reveals that the Fund is in surplus or deficit against the Funding Target, employers' contribution rates may be adjusted to target restoration of fully funding the solvent position over a period of years (the Recovery Period). The Recovery Period to an employer or group of employers is therefore the period over which any adjustment to the level of contributions in respect of a surplus or deficiency relative to the Funding Target used in the valuation is payable.

The Recovery Period applicable for each participating employer is set by the Administering Authority in consultation with the Fund Actuary and the employer, with a view to balancing the various funding requirements against the risks involved due to such issues as the financial strength of the employer and the nature of its participation in the Fund, and whether the employer is in surplus or deficit on the appropriate Funding Target.

Where an employer is in surplus, and where an employer's expected exit date is unknown or expected to be later than the date the revised rates and adjustments certificate will come into force following the next valuation, this surplus will only lead to an adjustment in an employer's contributions to the extent that this surplus is in excess of 10% of the value of that employer's liabilities valued relative to the

appropriate Funding Target (i.e. to the extent that the employer's funding level is greater than 110%).

London Borough of Southwark (which is the largest employer in the Fund) had a surplus of less than 10% of their liabilities at the valuation at 31 March 2022, and so no recovery period has been used for the London Borough of Southwark group of employers.

The Administering Authority recognises that a large proportion of the Fund's liabilities are expected to arise as benefit payments over long periods of time. For employers of sound covenant, and where the employer is in deficit, the Administering Authority may be prepared to agree to Recovery Periods which are longer than the average future working lifetime of the membership of that employer. The Administering Authority recognises that such an approach is consistent with the aim of keeping employer contribution levels as nearly constant as possible. However, the Administering Authority also recognises the risk in relying on long Recovery Periods and has agreed with the Fund Actuary a limit of 30 years, for employers which are assessed by the Administering Authority as being a long term secure employer.

Where employers are in deficit, the Administering Authority's policy is to agree Recovery Periods with each employer which are typically shorter where possible within the above framework. For employers whose participation in the fund is for a fixed period it is unlikely that the Administering Authority and Fund Actuary would agree to a Recovery Period longer than the remaining term of participation.

If any employers enter into deferred debt agreement the recovery period for the deferred employer will be the remaining period of the deferred debt agreement.

Grouping

In some circumstances it may be desirable to group employers within the Fund together for funding purposes (i.e. to calculate employer contribution requirements). Reasons might include reduction of volatility of contribution rates for small employers, facilitating situations where employers have a common source of funding or accommodating employers who wish to share the risks related to their participation in the Fund.

The Administering Authority recognises that grouping can give rise to cross subsidies from one employer to another over time. Employers may be grouped entirely, such that all of the risks of participation are shared, or only partially grouped such that only specified risks are shared. The Administering Authority's policy is to consider the position carefully at the initial grouping and at each valuation and to notify each employer that is grouped which other employers it is grouped with and details of the grouping method used. If the employer objects to this grouping, it will be set its own contribution rate. For employers with more than 50 contributing members, the Administering Authority would look for evidence of homogeneity between employers before considering grouping. For employers whose participation is for a fixed period grouping is unlikely to be permitted, unless the grouping is with the letting authority for the purpose of risk sharing arrangements.

Where employers are grouped together for funding purposes, this will only occur with the consent of the employers involved.

All employers in the Fund are grouped together in respect of the risks associated with payment of lump sum benefits on death in service – in other words, the cost of such

benefits is shared across the employers in the Fund. Such lump sum benefits can cause funding strains which could be significant for some of the smaller employers without insurance or sharing of risks. The Fund, in view of its size, does not see it as cost effective or necessary to insure these benefits externally and this is seen as a pragmatic and low cost approach to spreading the risk.

Stepping

Again, consistent with the desirability of keeping primary (and overall) employer contribution levels as nearly constant as possible, the Administering Authority will consider, at each valuation, whether new contribution rates should be payable immediately, or should be reached by a series of steps over future years. The Administering Authority will discuss with the Fund Actuary the risks inherent in such an approach, and will examine the financial impact and risks associated with each employer. The Administering Authority's policy is that in the normal course of events no more than three annual steps will be permitted. Further steps may be permitted in extreme cases in consultation with the Fund Actuary, but the total is very unlikely to exceed six steps.

Pre-payment of contributions

The Administering Authority may, after considering the advice of the Fund Actuary, permit particular employers to pay contributions early as a lump sum that would otherwise be payable over the following year (or a longer period not exceeding three years). An appropriate discount, as determined by the Fund Actuary, would be applied to the contributions to reflect the early payment. A true-up adjustment may be required if the early payment of contributions based on an estimated payroll results in lower contributions being paid into the Fund (after allowing for the discount) than would otherwise have been the case.

Inter-valuation funding calculations

In order to monitor developments, the Administering Authority may from time to time request informal valuations or other calculations. Generally, in such cases the calculations will be based on an approximate roll forward of asset and liability values, and liabilities calculated by reference to assumptions consistent with the most recent preceding valuation. Specifically, it is unlikely that the liabilities would be calculated using individual membership data, and nor would the assumptions be subject to review as occurs at formal funding valuations.

The Administering Authority will consider reviewing employer contributions between formal valuations in certain circumstances. The policy on this is set out in Section 7 – Policy on Employer Flexibilities and reviewing Employer Contributions between Triennial Valuations.

Asset shares notionally allocated to individual employers

Notional asset shares

In order to establish contribution requirements for individual employers or groups of employers it is convenient to notionally subdivide the Fund as a whole between the employers (or group of employers where grouping operates), as if each employer had its own notional asset share within the Fund. Admission bodies with fixed contribution rates are grouped with London Borough of Southwark for this purpose.

This subdivision is for funding purposes only. It is purely notional in nature and does not imply any formal subdivision of assets, nor ownership of any particular assets or groups of assets by any individual employer or group.

Roll-forward of notional asset shares

The notional asset shares allocated to each employer will be rolled forward allowing for all cash flows associated with that employer's membership, including contribution income, benefit outgo, transfers in and out and investment income allocated as set out below. In general no allowance is made for the timing of contributions and cash flows for each year are assumed to be made half way through the year with investment returns assumed to be uniformly earned over that year.

Further adjustments are made for:

- A notional deduction to meet the expenses paid from the Fund in line with the assumption used at the previous valuation.
- Allowance for any known material internal transfers in the Fund (cash flows will not exist for these transfers). The Fund Actuary will assume an estimated cash flow equal to the value of the liabilities determined consistent with the Funding Target transferred from one employer to the other unless some other approach has been agreed between the two employers.
- Allowance for lump sum death in service and any other benefits shared across all employers (see earlier).
- An overall adjustment to ensure the notional assets attributed to each employer is equal to the total assets of the Fund which will take into account any gains or losses related to the orphan liabilities.

In some cases information available will not allow for such cash flow calculations. In such a circumstance:

- Where, in the opinion of the Fund Actuary, the cash flow data which is unavailable is of low materiality, or where estimated cashflows can be produced with reasonable accuracy, estimated cash flows will be used
- Where, in the opinion of the Fund Actuary, the cash flow data which is unavailable is material, or difficult to estimate with necessary accuracy, the Fund Actuary may instead use an analysis of gains and losses to roll forward the notional sub-fund. Analysis of gains and losses methods are less precise than use of cash flows and involve calculation of gains and losses relative to the surplus or deficiency exhibited at the previous valuation. Having established an expected surplus or deficiency at this valuation, comparison of this with the liabilities evaluated at this valuation leads to an implied notional asset holding.
- Analysis of gains and losses methods will also be used where the results of the cash flow approach appears to give unreliable results perhaps because of unknown internal transfers.

Fund maturity

To protect the Fund, and individual employers, from the risk of increasing maturity producing unacceptably volatile contribution adjustments as a percentage of pay, the

Administering Authority will normally require defined capital streams from employers in respect of any disclosed funding deficiency.

In certain circumstances, for secure employers considered by the Administering Authority as being long term in nature, contribution adjustments to correct for any disclosed deficiency may be set as a percentage of payroll. Such an approach carries an implicit assumption that the employer's payroll will increase at an assumed rate. If payroll fails to grow at this rate, or declines, insufficient corrective action will have been taken. To protect the Fund against this risk, the Administering Authority will consider requiring top up payments where deficit contributions fall below a minimum level, or further alternative approaches as it deems appropriate.

Long-term cost efficiency

In order to ensure that measures taken to maintain stability of employer contributions are not inconsistent with the statutory objective for employer contributions to be set so as to ensure the long-term cost efficiency of the Fund, the Administering Authority has assessed the actual contributions payable by considering:

- The implied average recovery period, allowing for the stepping of employer contribution changes;
- The investment return required to achieve full funding over the recovery period; and
- How the investment return compares to the Administering Authority's view of the expected future return being targeted by the Fund's investment strategy.

SECTION 5

SPECIAL CIRCUMSTANCES RELATED TO CERTAIN EMPLOYERS

Interim reviews

As part of each valuation separate employer contribution rates are assessed by the actuary for each participating employer or group of employers. The Administering Authority also monitors the position and may amend contributions between valuations as permitted by Regulations 64(4) and 64A. Further details of the Administering Authority's policy in relation to reviewing contributions is set out in section 7.

Guarantors

Some employer may participate in the Fund by virtue of the existence of a Guarantor. The Administering Authority maintains a list of employers and their associated Guarantors, and monitors the exposure of the Guarantors. The Administering Authority, unless notified otherwise, sees the duty of a Guarantor to include the following:

- If an employer ceases and defaults on any of its financial obligations to the Fund, the Guarantor is expected to provide finance to the Fund such that the Fund receives the amount certified by the Fund Actuary as due, including any interest payable thereon.
- If the Guarantor is an employer in the Fund and is judged to be of suitable covenant by the Administering Authority, the Guarantor may defray some of the financial liability by subsuming the residual liabilities into its own pool of Fund liabilities. In other words, it agrees to be a source of future funding in respect of those liabilities should future deficiencies emerge.
- During the period of participation of the employer a Guarantor can at any time agree to the future subsumption of any residual liabilities of an employer. The effect of that action would be to reduce the Funding and Solvency Targets for the employer, which would probably lead to reduced contribution requirements.

New employers

Initial Rate

When a new employer joins the Fund, the Fund's Actuary determines the initial employer contribution rate payable.

An interim contribution rate may be set pending a more accurate calculation by the Fund's Actuary of the employer contribution rate payable. The Administering Authority will determine these interim contribution rates following each Actuarial Valuation and at any other time at its discretion.

The employer contribution rate will be set in accordance with the Funding Strategy Statement, taking into consideration elements such as:

- Any past service or transferred liabilities

- Whether the new employer is open or closed to new entrants
- The funding target that applies to the employer
- The funding level on commencement and, where there is a surplus or deficit, whether the admission agreement is fixed term or not, whether open or closed and the period of any fixed term contract period or average future working lifetime of the employee membership (as appropriate)
- Other relevant circumstances as determined by the Administering Authority on the advice of the Fund Actuary

New Admission Bodies

Where the Administering Authority makes an admission agreement with a body (the New Body), the default stance of the Fund is that the relevant Scheme employer, as defined in Part 3 of Schedule 2 of the LGPS Regulation 2013, will be required to retain ultimate responsibility for funding the liabilities of new admission body, with the admission body paying contributions in accordance with terms of the Admission Agreement or side agreement. This applies to both the liabilities of the initial transferring membership and, in the case of an open admission agreement, any liabilities of the New Body relating to members that commence participation after the initial transfer under the terms of the Admission Agreement.

Bonds and other securitization

Paragraph 6 of Part 3, Schedule 2 of the Regulations creates a requirement for a new admission body to carry out, to the satisfaction of the Administering Authority (and Scheme Employer in the case of an Admission Body admitted under paragraph 1(d)(i) of that Part), an assessment taking account of actuarial advice, of the level of risk arising on premature termination of the provision of service or assets by reason of insolvency, winding up or liquidation.

Where the level of risk identified by the assessment is such as to require it, the Admission Body shall enter into an indemnity or bond with an appropriate party. Where for any reason it is not desirable for an Admission Body to enter into an indemnity bond, the Admission Body is required to secure a guarantee in a form satisfactory to the Administering Authority from an organisation who either funds, owns or controls the functions of that admission body.

The Administering Authority's approach in this area is as follows:

- In the case of Admission Bodies admitted under Paragraph 1(d) of Part 3, Schedule 2 of the Regulations and other Admission Bodies with a Guarantor, and so long as the Administering Authority judges the relevant Scheme Employer or Guarantor to be of sufficiently sound covenant, any bond exists purely to protect the relevant Scheme Employer or Guarantor on default of the Admission Body. As such, it is entirely the responsibility of the relevant Scheme Employer or Guarantor to arrange any risk assessments and decide the level of bond required from the Admission Body, if any. In this case, the Administering Authority will be pleased to supply some standard calculations provided by the Fund Actuary to aid the relevant Scheme Employer or Guarantor, but this should not be construed as advice to the relevant Scheme Employer or Guarantor on this matter. Once the Scheme Employer or Guarantor confirms their agreement to the level of bond cover proposed, the

Administering Authority will be happy to provide a separate document to the Admission Body setting out the level of cover which the Administering Authority and Scheme Employer/ Guarantor consider suitable, but this should not be constructed as advice relevant to the Admission Body on this matter.

- In the case of:
 - Admission bodies admitted under paragraph 1(e) of Part 3, Schedule 2
 - Admission bodies admitted under paragraph 1(d) of Part 3, Schedule 2 where the Administering Authority does not judge the Scheme Employer to be of sufficiently strong covenant
 - Other Admission bodies with no Guarantor or where the Administering Authority does not judge the Guarantor to be of sufficiently strong covenant;

the admission will only be able to proceed once the Administering Authority has agreed the level of bond cover. As such, the Administering Authority will obtain some "standard" calculations from the Fund Actuary to assist them to form a view on what level of bond would be satisfactory. The Administering Authority will be pleased to supply this calculation to the Scheme Employer or Guarantor, where relevant, but this should not be construed as advice to the relevant Scheme Employer or Guarantor on this matter. Once the Scheme Employer or Guarantor, where relevant, confirms their agreement to the level of bond proposed, the Administering Authority will be happy to provide a separate document to the Admission Body setting out the level of cover which the Administering Authority and Scheme Employer/ Guarantor, where relevant, consider suitable but this should not be constructed as advice relevant to the Admission Body on this matter.

- The Administering Authority notes that levels of required bond cover can fluctuate and will review, or recommend that the Scheme Employer reviews, the required cover at least once a year.

Subsumed liabilities

Where an employer is ceasing participation in the Fund such that it will no longer have any contributing members, it is possible that another employer in the Fund agrees to provide a source of future funding in respect of any emerging deficiencies in respect of those liabilities.

In such circumstances the liabilities are known as subsumed liabilities (in that responsibility for them is subsumed by the accepting employer). For such liabilities the Administering Authority will assume that the investments held in respect of those liabilities will be the same as those held for the rest of the liabilities of the accepting employer. Generally this will mean assuming continued investment in a mix of growth and matching assets.

Orphan liabilities

Where an employer is ceasing participation in the Fund such that it will no longer have any contributing members, unless any residual liabilities are to become subsumed liabilities, the Administering Authority will act on the basis that it will have no further access for funding from that employer once any exit valuation, carried out in accordance with Regulation 64, has been completed and any sums due have been

paid. Residual liabilities of employers from whom no further funding can be obtained are known as orphan liabilities.

The Administering Authority will seek to minimise the risk to other employers in the Fund that any deficiency arises on the orphan liabilities such that this creates a cost for those other employers to make good the deficiency. To give effect to this, the Administering Authority will seek funding from the outgoing employer sufficient to enable it to match the liabilities with low risk investments, generally Government fixed interest and index linked bonds.

To the extent that the Administering Authority decides not to match these liabilities with Government bonds of appropriate term then any excess or deficient returns will be added to or deducted from the investment return to be attributed to the other employers' notional assets between the exit date of the employer and each subsequent funding valuation of the Fund. Assets will then be reallocated within the Fund to ensure the orphan liabilities remain 100% funded on a low risk basis after taking account of any outstanding exit payments payable to, or due from the exiting employer, with any investment profit or loss allocated to the contributing employers in proportion to their notional asset share.

Cessation of participation (i.e. Exiting the Fund)

Where an employer becomes an exiting employer, an exit valuation will be carried out in accordance with Regulation 64. That valuation will take account of any activity as a consequence of exit of participation regarding any existing contributing members (for example any bulk transfer payments due) and the status of any liabilities that will remain in the Fund. When employees do not transfer to another employer they will retain pension rights within the Fund, i.e. either as a deferred pensioner or immediately taking retirement benefits.

The assumptions adopted to value the departing employer's liabilities for the exit valuation will depend upon the circumstances. In particular, the exit valuation will distinguish between residual liabilities which will become orphan liabilities, and liabilities which will be subsumed by other employers and will take account of any contractual guarantees where possible and notified to the Administering Authority.

Regardless of whether the residual liabilities are orphan liabilities or subsumed liabilities, the exit valuation will determine final payments required to make good the funding position revealed unless a contractual agreement sets out that another employer will take responsibility for all the assets and liabilities relating to the exiting employer. In other words, the fact that liabilities may become subsumed liabilities does not necessarily remove the possibility of an exit payment being required.

Any deficit or surplus in the Fund in respect of the employer will generally be due to the Fund as a termination contribution, or payable by the Fund to the employer as an exit credit respectively, where the exit date is on or after 14 May 2018.

Further details on the Administering Authority's policy on employer exits and interim reviews is included in Section 7.

Academies

Academies are scheduled bodies and, as such, have an automatic right to join the LGPS. Guidance has been issued by the Secretaries of State for Education and

Communities and Local Government but in practice differing approaches are being taken when setting the funding strategy for academies.

With effect from the 2019 valuation, the fund will no longer be assessing individual funding positions and contribution rates for each academy where those academies are part of a Multi Academy Trust (MAT). These will instead be assessed at a combined MAT level (based on academies participating in the Southwark Fund for each MAT), given the regulations set out that it is the MAT that is the Scheme Employer and not the individual academy. The Actuary will therefore assess a combined MAT position only for the value of the assets, liabilities and employer cost of benefits accruing to active members. Contribution rates will be determined based on the active membership of the MAT as a whole and the combined academies' funding deficit or surplus.

Where a new academy joins an existing Multi Academy Trust which has been certified a contribution rate in the Fund, the Fund will require that the Multi Academy Trust ensures that contributions are paid in respect of this academies membership of the Fund.

If the relevant Multi Academy Trust has not previously been certified a contribution rate in the Fund an initial rate will be calculated by the Fund Actuary as set out in the section above.

In future for a new academy conversion while the London Borough of Southwark's asset share is in deficit, the Administering Authority's standard approach will be to:

- Allocate liabilities to the academy in relation to its current employees only, with the London Borough of Southwark asset share retaining liability for former employees;
- Allocate a notional share of assets from the London Borough of Southwark's asset share to the new academy's asset share based on what is known as a "capped prioritised share of fund" approach. This means that the academy will inherit an appropriate share of any deficit attributable at conversion to the London Borough of Southwark's former employees as well as the academy's own employees. Where the prioritised share of Fund is greater than the value of the transferring membership, calculated using the appropriate Funding Target, the notional asset share to be transferred will be capped at 100% of the value of the transferring membership.

Where an academy transfers from one Multi Academy Trust participating in the Fund to another Multi Academy Trust participating in the Fund the notional reallocation of assets between the relevant Multi Academy Trusts will be calculated using the "capped prioritised share of fund" approach set out above, unless the transfer of the academy results in cessation of participation in the Fund of a Multi Academy Trust, in which case additional considerations will apply and the method for determining the notional reallocation of assets will be determined by the Administering Authority in consultation with the Fund Actuary.

SECTION 6 IDENTIFICATION OF RISKS AND COUNTER MEASURES

Approach

The Administering Authority seeks to identify all risks to the Fund and to consider the position both in aggregate and at an individual risk level. The Administering Authority will monitor the risks to the Fund, and will take appropriate action to limit the impact of these before, and after they emerge, wherever possible. The main risks to the Fund are considered below:

Choice of Solvency and Funding Targets

The Administering Authority recognises that future experience and investment income cannot be predicted with certainty. Instead, there is a range of possible outcomes, and different assumed outcomes will lie at different places within that range.

The more optimistic the assumptions made in determining the Solvency and Funding Targets, the more that outcome will sit towards the 'favourable' end of the range of possible outcomes, the lower will be the probability of experience actually matching or being more favourable than the assumed experience, and the lower will be the Solvency and Funding Targets calculated by reference to those assumptions.

The Administering Authority will not adopt assumptions for Scheduled Bodies and certain other bodies which, in its judgement, and on the basis of actuarial advice received, are such that it is less than 55% likely that the strategy will deliver funding success (as defined earlier in this document). Where the probability of funding success is less than 65% the Administering Authority will not adopt assumptions which lead to a reduction in the aggregate employer contribution rate to the Fund.

The Administering Authority's policy will be to monitor an underlying 'low risk' position (making no allowance for returns in excess of those available on Government stocks) to ensure that the Funding Target remains realistic.

Investment Risk

This covers items such as the performance of financial markets and the Fund's Investment managers, asset reallocation in volatile markets, leading to the risk of investments not performing (income) or increasing in value (growth) as forecast. Examples of specific risks would be:

- Assets not delivering the required return (for whatever reason, including manager underperformance)
- Systematic risk with the possibility of interlinked and simultaneous financial market volatility
- Insufficient funds to meet liabilities as they fall due
- Inadequate, inappropriate or incomplete investment and actuarial advice is taken and acted upon
- Counterparty failure

The specific risks associated with assets and asset classes are:

- Equities – industry, country size and stock risks
- Fixed income – yield curve, credit risks, duration risks and market risks
- Alternative assets – liquidity risks, property risks, alpha risk
- Money market – credit risk and liquidity risk

- Currency risk
- Macroeconomic risks
- environmental; social and corporate governance risks

The Fund mitigates these risks through diversification, investing in a wide variety of markets and assets, and through the use of specialist managers with differing mandates in addition to access to the range of managers via the Wales Pension Partnership investment pool.

The Administering Authority reviews each investment manager's performance quarterly and annually considers the asset allocation of the Fund by carrying out an annual review meeting with its Investment Advisors, Fund Managers and Fund Actuary. The Administering Authority also annually reviews the effect of market movements on the Fund's overall funding position.

If there are significant market movements between the valuation date and the date the valuation is signed off the Administering Authority, on the advice of the Actuary, will consider what allowance should be made, if any, when finalising employer contributions .

Employer Risk

The risks arise from the ever-changing mix of employers; from short-term and ceasing employers; and the potential for a deficit in payments and/or orphaned liabilities. Public sector spending challenges and inflation may have adverse consequences for employer finances and their ability to make contributions. The Administering Authority monitors employer payments and expects employers in financial difficulty to engage with the Fund, noting that contributions can be reviewed between formal valuations if the conditions in Regulation 64(4) or 64A and the terms of the Administering Authority's policy, as set out in Section 7 below, are met.

The Administering Authority will put in place a funding strategy statement which contains sufficient detail on how funding risks are managed in respect of the main categories of employer (e.g. scheduled and admitted) and other pension fund stakeholders.

The Administering Authority will maintain a knowledge base on their admitted bodies and their legal status (charities, companies limited by guarantee, group/subsidiary arrangements) and use this information to inform the Funding Strategy Statement.

Climate change

The systemic risks posed by climate change and the policies implemented to tackle them will fundamentally change economic, political and social systems and the global financial system. They will impact every asset class, sector, industry and market in varying ways and at different times, creating both risks and opportunities for investors. The Administering Authority and Investment Advisory Panel keeps the effect of climate change on future returns under review and will commission modelling or advice from the Fund Actuary on the potential effect on funding as required.

The Administering Authority has commissioned scenario analysis modelling on the potential effect on funding from the Fund's Actuary which will be reported in the 2022 valuation report. This modelling is expected to meet the Government Actuary's requirements for the 2022 valuations as well as supporting the Fund's reporting under

DLUHC's proposed new TCFD (Taskforce on Climate-Related Financial Disclosures) regime for LGPS funds.

Liquidity and maturity risk

This is the risk of a reduction in cash flows into the Fund (including investment income – e.g. potentially resulting from changes in investment holdings), or an increase in cash flows out of the Fund, or both, which can be linked to changes in the membership and, in particular, a shift in the balance from contributing members to members drawing their pensions. Changes in the funding position and hence (secondary) employer contributions can also affect the cashflow position since it is not always possible to deliver complete stability of contributions. Timing of contribution payments by employers can also impact on liquidity requirements where flexibility is granted by the Administering Authority. Changes within the public sector and to the LGPS itself may affect the maturity profile of the LGPS and have potential cash flow implications. For example,

- Budget cuts and headcount reductions could reduce the active (contributing) membership and increase the number of pensioners through early retirements;
- An increased emphasis on outsourcing and other alternative models for service delivery may result in falling active membership (e.g. where new admissions are closed),
- Public sector reorganisations may lead to a transfer of responsibility between different public sector bodies, (e.g. to bodies which do not participate in the LGPS),
- Lower member contribution rates or a change in the contribution rates, agreed as part of the Cost Management Process or otherwise, may lead to lower income if not immediately matched by higher employer contributions,
- An increase in opt-outs and the take-up of the 50/50 option (whether on affordability grounds which may currently be considered to be an increased risk due to current cost of living pressures) will reduce member contributions to the Fund
- Improved funding positions may lead to employer contribution rates being reduced.

The Administering Authority seeks to maintain regular contact with employers to mitigate against the risk of unexpected or unforeseen changes in maturity or other changes leading to cashflow or liquidity issues. The Administering Authority also commissions the Fund Actuary to provide projections of benefit payments and contributions based at each valuation and monitors the cashflow position on a regular basis.

Governance Risk

This covers the risk of unexpected structural changes in the Fund membership (for example the closure of an employer to new entrants or the large scale withdrawal or retirement of groups of staff), or establishment of a wholly owned company which does not participate in the Fund, or only partially participates, and the related risk of the Administering Authority not being made aware of such changes in a timely manner.

The Administering Authority's policy is to require regular communication between itself and employers, and to ensure regular reviews of such items as bond arrangements, financial standing of non-tax raising employers and funding levels.

Particular examples of risk mitigation are set out below:

- Early retirement and ill health strain payments - No allowance is made in actuarial valuations of the Fund for the additional value of the benefits when a member is made redundant, is in ill health or leaves on the grounds of efficiency. To counter the potential 'strain' (or cost) emerging at the next valuation early retirement strain payments are required from the employer to the Fund to meet this additional cost over a period of no longer than 3 years.
- Bodies ceasing to exist with unpaid deficiency - Some employers can cease to exist and become insolvent leaving the employers in the Fund open to the risk of an unpaid deficit. For admission bodies admitted under paragraph 1(d) of Part 3, Schedule 2, any such deficit will be met by the relevant Scheme Employer and there is therefore little risk to other employers in the Fund (provided of course that the relevant Scheme Employer is itself regarded to be of good covenant).

Other employers are more problematic and the Administering Authority will as far as practicable look to reduce risks by:

- Use of bond arrangements or,
- Ensuring there is a guarantor to back the liabilities of the body, or,
- Monitoring other employers with small or declining membership to ensure that funding is close to 100% on the solvency measure by the time the last member leaves service and this may affect the funding strategy accordingly

Statistical/Financial Risk

This covers such items such as the performances of markets, Fund investment managers, asset reallocation in volatile markets, pay and /or price inflation varying from anticipated levels or the effect of possible increases in employer contribution rate on service delivery and on Fund employers. The Administering Authority policy will regularly assess such aspects to ensure that all assumptions used are still justified.

Liability Risk

The main risks include discount rates, pay and price inflation, life expectancy, changing retirement pattern and other demographic changes.

The Administering Authority will ensure that the Fund Actuary investigates demographic, pay and pension increase experience at each valuation and reports on developments. The demographic assumptions are intended to be best estimate, informed by Fund experience and wider evidence where needed, e.g. the mortality assumptions are informed by a postcode analysis carried out by the Fund Actuary's specialist longevity team and the projections model released by the Continuous Mortality Investigation of the Institute and Faculty of Actuaries. If the Administering Authority becomes aware of any material changes in population mortality which may also be reflected in the Fund's experience it will ask the Fund Actuary to report on the effect on the funding position and employer contributions.

The Fund Actuary will also provide quarterly funding updates to assist the Administering Authority in its monitoring of the financial liability risks. The Administering Authority will, as far as practical, monitor changes in the age profile of the Fund membership, early retirements and redundancies and, if any changes are

considered to be material, ask the Fund Actuary to report on their effect on the funding position and employer contributions.

Allowance has been made for prevailing high levels of consumer price inflation in the calculation of the liabilities as at 31 March 2022 as set out in paragraph 4.17 above. If significant changes in the value of the liabilities become apparent between valuations, including inflation above the levels allowed for in the 2022 valuation, the Administering Authority will notify the affected employers of the anticipated impact on costs that will emerge at the next valuation and consider whether any bonds that are in place for Admission Bodies require review. It will also consider the extent to which such changes can or should be allowed for in exit valuations, taking advice from the Fund Actuary.

Regulatory and Compliance Risk

The risks relate to changes to both general and LGPS specific regulations, national pension requirements or HM Revenue and Customs' rules.

The Administering Authority will keep abreast of all proposed changes. If any change potentially affects the costs of the Fund, the Administering Authority will ask the Fund Actuary to assess the possible impact on costs of the change. Where significant, the Administering Authority will notify employers of the possible impact and the timing of any change.

There are a number of consultations which have been issued in recent years, some of which represent proposed changes which were first raised a number of years ago, including a cap on exit payments by public sector employers and new Fair Deal arrangements. Some of these may affect funding and pose a risk to the Fund. The Government has also consulted on changes to the valuation cycle although the 2022 valuation is going ahead as previously planned.

There are a number of additional uncertainties associated with the benefit structure at the time of the latest formal review of this Statement, including:

- The timing and detail of any final regulations in relation to the McCloud/Sargeant cases which ruled that the transitional protections implemented in the Firefighters' and Judges' Pension Schemes are illegal age discrimination.
- The outcome of the cost management process as at 31 March 2020 (and the Judicial Review of the 2016 process).
- The Goodwin case in which an Employment Tribunal ruled (in relation to the Teachers' Pension Scheme) that the less favourable provisions for survivor's benefits of a female member in an opposite sex marriage compared to a female in a same sex marriage or civil partnership amounts to direct discrimination on grounds of sexual orientation. Following a written ministerial statement by the Chief Secretary to the Treasury on 20 July 2020 it is expected that changes will be made to the LGPS Regulations to reflect the ruling, but no changes have yet been proposed.

For the purposes of the 2022 valuation, an approximate employer specific allowance will be made in respect of the McCloud remedy based upon a high-level analysis of the employer's fund membership. Members' benefits will be valued as required by

relevant legislation as in force as at 31 March 2022, except for the following assumptions:

- i. It will be assumed that the current underpin (which only applies to those members within 10 years of their Normal Pension Age at 31 March 2012) will be revised and apply to all members who were active in the scheme on or before 31 March 2012 and who join the 2014 Scheme without a disqualifying service gap.
- ii. The period of protection will apply from 1 April 2014 to 31 March 2022 but will cease when a member leaves active service or reaches their final salary scheme normal retirement age (whichever is sooner).
- iii. Where a member remains in active service beyond 31 March 2022, the comparison of their benefits will be based on their final salary when they leave the LGPS or when they reach their final salary scheme normal retirement age (whichever is sooner).
- iv. Underpin protection will apply to qualifying members who leave active membership of the LGPS with an immediate or deferred entitlement to a pension.
- v. The underpin will consider when members take their benefits, so they can be assured they are getting the higher benefit.

Smoothing Risk

The Administering Authority recognises that utilisation of a smoothing adjustment in the solvency measurement introduces an element of risk, in that the smoothing adjustment may not provide a true measure of the underlying position. Where such an adjustment is used, the Administering Authority will review the impact of this adjustment at each valuation to ensure that it remains within acceptable limits to ensure that it does not alter the disclosed solvency level by more than 5%.

Recovery Period Risk

The Administering Authority recognises that permitting surpluses or deficiencies to be eliminated over a recovery period rather than immediately introduces a risk that action to restore solvency is insufficient between successive measurements. The Administering Authority will discuss the risks inherent in each situation with the Fund Actuary and to limit the permitted length of recovery period where appropriate. Details of the Administering Authority's policy are set out earlier in this Statement.

Stepping Risk

The Administering Authority recognises that permitting contribution rate changes to be introduced by annual steps rather than immediately introduces a risk that action to restore solvency is insufficient in the early years of the process. The Administering Authority will limit the number of permitted steps as appropriate. Details of the Administering Authority's policy are set out earlier in this Statement.

Section 7: Policy on Employer Flexibilities and reviewing Employer Contributions between Triennial Valuations

Review of Employer Contribution Rates

The Regulations require a triennial Actuarial Valuation of the Fund. As part of each Actuarial Valuation the contributions paid by each employer in the Fund are reviewed and may be increased or reduced.

The employer contributions payable by employers may also be reviewed outside of the triennial Actuarial Valuations where:

- i. it appears likely to the administering authority that the amount of the liabilities arising or likely to arise has changed significantly since the last valuation;
- ii. it appears likely to the administering authority that there has been a significant change in the ability of the Scheme employer or employers to meet the obligations of employers in the Scheme;
- iii. it appears to the Administering Authority that it is likely that the Scheme employer will become an exiting employer; or
- iv. a Scheme employer or employers have requested a review of Scheme employer contributions and have undertaken to meet the costs of that review.

For the avoidance of doubt, the Administering Authority will not consider a review of contributions under 64A purely on the grounds of a change in market conditions affecting the value of assets and/or liabilities.

Details of the Fund's policy on reviewing employer contributions under these provisions are set out below.

In addition, in exceptional circumstances contributions may be reviewed between valuations where this is indicated in the Rates and Adjustments Certificate.

Factors used to determine when a review is appropriate

In determining whether or not a review should take place under 64A, the Administering Authority will consider the following factors (noting that this is not an exhaustive list):

- the circumstances leading to the change in liabilities arising or likely to arise, for example whether this is the result of a decision by the employer, such as the restructuring of a Multi-Academy Trust, a significant outsourcing or transfer of staff, closure to new entrants, material redundancies or significant pay awards, or other factors such as ill-health retirements, voluntary withdrawals or the loss of a significant contract
- the materiality of any change in the employer's membership or liabilities, taking account of the Actuary's view of how this might affect its funding position, primary or secondary contribution rate
- whether, having taken advice from the Actuary, the Administering Authority believes a change in ongoing funding target or deficit recovery period would be justified, e.g. on provision or removal of any security, subsumption commitment, bond, guarantee, or other form of indemnity in relation to the employer's liabilities in the Fund
- the materiality of any change in the employer's financial strength or longer-term financial outlook, based on information supplied by the employer and

- supported by a financial risk assessment or more detailed covenant review carried out by the Fund Actuary or other covenant adviser to the Fund
- the general level of engagement from the employer and its adherence to its legal obligations as set out in the Pensions Administration Strategy Statement and elsewhere, including the nature and frequency of any breaches such as failure to pay contributions on time and data quality issues due to failure to provide new starter or leaver forms
 - whether the employer was both in surplus at the previous valuation date, and paying contributions in excess of the primary rate certified in the resulting Rates and Adjustments Certificate. If this is the case the administering authority would then also take into account the Fund Actuary's view on whether the employer is still in a surplus position at the date of the review.

For an admission body where contributions may be reviewed under Regulation 64(4), the following considerations will apply:

- Where the date of exit is known, and is more than three years hence, or is unknown and participation is assumed to be indefinite, the Administering Authority will generally not deem it necessary to carry out an interim valuation.
- For Admission Bodies admitted under paragraph 1(d) of Part 3 Schedule 2 of the Regulations falling into the above category, the Administering Authority sees it as the responsibility of the relevant Scheme Employer to instruct it if an interim valuation is required. Such an exercise would be at the expense of the relevant Scheme Employer unless otherwise agreed.
- A material change in circumstances, such as the date of exit becoming known, material membership movements or material financial information coming to light may cause the Administering Authority to informally review the situation and subsequently formally request an interim valuation.
- For an employer whose participation is due to cease within the next three years, the Administering Authority will keep an eye on developments and may see fit to request an interim valuation at any time.

Notwithstanding the above guidelines, the Administering Authority reserves the right to request an interim valuation of any employer at any time if Regulation 64(4) applies.

Assessment of the risk/impact on other employers

In determining whether or not a review should take place, the Administering Authority will generally focus on the materiality of any potential changes in the context of the employer concerned; its financial position and current contribution levels. As a matter of principle, the Administering Authority does not consider that a review is not justified just because an employer is small in the context of the Fund as a whole, noting that failure to act could make discussions at the next formal valuation more difficult and compound the risk to the Fund. However, in determining the extent and speed of any changes to the employer's contributions the Administering Authority will consider the effect on the overall funding position of the Fund, i.e. other Fund employers.

Where contributions are being reviewed for an employer with links to another Fund employer, particularly where this is a formal organisational or contractual link, e.g. there is a tripartite admission agreement, an ownership relationship or a formal

guarantee or subsumption commitment is in place, the Administering Authority will consider the potential risk/impact of the contribution review on those other employer(s), taking advice from the Fund Actuary as required.

Employer involvement and consultation

It is expected that in most cases the employer will be aware of the proposed review of their contributions since this will be triggered by an employer's action and employers should be aware of the need to engage with the Fund in relation to any activity which could materially affect their liabilities or ability to meet those liabilities. The requirements on employers to inform the Fund of certain events are set out in the Pensions Administration Strategy.

In other cases information will be required from the employer, e.g. in relation to its financial position and business plans which could be the catalyst for informing the employer that a review is being proposed. In all cases the Administering Authority will advise the employer that a review is being carried out and share the results of the review and any risk or covenant assessment as appropriate. It should be noted that the fact of a review being carried out does not automatically mean that contributions will be amended (up or down) since that will depend upon the materiality of the changes and other factors such as the outcome of discussions with the employer and any related/linked employer in the Fund and the proximity to the next formal valuation.

Where, following representations from the employer, the Administering Authority is considering not increasing the employer's contributions following a review, despite there being good reason to do so from a funding and actuarial perspective, e.g. if it would precipitate the failure of the employer or otherwise seriously impair the employer's ability to deliver its organisational objectives or it is expected that the employer's financial position will improve significantly in the near-term, the Administering Authority will consult with any related/linked employers (including any guarantor or employer providing a subsumption commitment) with a view to seeking their agreement to this approach.

Process for requesting a review

Before requesting a review, employers should consider the regulatory requirements and the Fund's policy as set out above and satisfy themselves that there has been a relevant change in the expected amount of liabilities or their ability to meet those liabilities. The employer should contact the Administering Authority and complete the necessary information requirements for submission to the Administering Authority in support of their application.

The Administering Authority will consider the employer's request and may ask for further information or supporting documentation/evidence as required. If the Administering Authority, having taken actuarial advice as required, is of the opinion that a review is justified, it will advise the employer and provide an indicative cost. Employers should be aware that all advisory fees incurred by the Fund associated with a contribution review request, whether or not this results in contributions being amended, will be recharged to the employer.

Other considerations

The Administering Authority may carry out a review at any time during the valuation cycle where it becomes aware that a review is required. In such cases the employer will be expected to provide the requested information within one month of request and the review will be completed within 6 weeks of the provision of all requested information, or completion of the risk/covenant assessment if later.

The Administering Authority will consult with the employer on the timing of any contribution changes and there will be a minimum of 4 weeks' notice given of any contribution increases. In determining whether, and when, any contribution changes are to take effect the Administering Authority will also take into account the timing of contribution changes flowing from the next formal valuation. As a result, contribution reviews are unlikely to be carried out during the 12-month period from the valuation date although if there were any material changes to the expected liabilities arising or the ability of the employer to meet those liabilities during that period, this should be taken into account when finalising the Rates and Adjustments Certificate flowing from the valuation.

Where a review is being carried out in the circumstances that the employer was both in surplus at the previous valuation date, and paying contributions in excess of the primary rate (i.e. positive secondary contributions), the revised contributions following the review will not be set at a level below the primary rate certified at the previous valuation.

Cessation of participation, Deferred Debt Agreements and Exit Payments

An employer can cease participation in the following circumstances:

- an active employer ceases to be a Scheme employer (including ceasing to be an admission body participating in the Fund), or has no active members contributing to the Fund and does not enter into a Deferred Debt Agreement,
- a deferred employer ceases to participate where the Deferred Debt Agreement ends.

Where participation ceases, an exit valuation will be carried out in accordance with Regulation 64. That valuation will take account of any activity as a consequence of cessation of participation regarding any existing contributing members (for example any bulk transfer payments due) and the status of any liabilities that will remain in the Fund. When employees do not transfer to another employer they will retain pension rights within the Fund, i.e. either as a deferred pensioner or immediately taking retirement benefits.

London Borough of Southwark's admission policy generally includes a guarantee that it will take on all the assets and liabilities on exit, with no exit payment falling on the exiting employer. For clarity, no exit credit will be payable to such employers on exit. The Fund Actuary will provide the Administering Authority with an exit valuation confirming that no exit deficit or surplus is due to be paid at the exit date and a revised rates and adjustments certificate showing the nil exit payment due from the exiting employer, as required under Regulation 64(2) of the LGPS Regulations.

The assumptions adopted to value the departing employer's liabilities for the exit valuation (including on termination of any Deferred Debt Agreement) will depend upon the circumstances. In particular, the cessation valuation will distinguish between residual liabilities which will become orphan liabilities, and liabilities which will be subsumed by other employers.

For orphan liabilities the Funding Target in the exit valuation will anticipate investment in low risk investments such as Government bonds. This is to protect the other employers in the Fund, as upon exit, the employer's liabilities will become "orphan" liabilities within the Fund, and there is no recourse to that (former) employer if a shortfall emerges in relation to these liabilities after the exit date.

For subsumed liabilities the Administering Authority's policy is that the funding target for assessing the liabilities on exit is the ongoing funding target appropriate to the subsuming body, updated for financial conditions at the exit date.

In exceptional circumstances the funding target for subsumed liabilities may be varied if deemed appropriate by the Administering Authority, on the advice of the Fund Actuary. For example, the Administering Authority may, at its discretion, include additional margins for prudence compared to the approach used for determining ongoing contributions, for example in relation to regulatory uncertainty.. The assumptions adopted to value the departing employer's liabilities for the exit valuation will depend upon the circumstances. In particular, the exit valuation will distinguish between residual liabilities which will become orphan liabilities, and liabilities which will be subsumed by other employers and will take account of any contractual guarantees where possible and notified to the Administering Authority.

For exits where the calculations are undertaken on or after the date this statement comes into force, the following refinements will be made to the approach at the 2022 funding valuation:

- the allowance made for the potential liabilities arising from the McCloud judgement remedy will be refined as required once the final remedy is known and as the data required to accurately assess any additional liabilities becomes available, as advised by the fund actuary
- the allowance for short-term inflation above the long-term assumption underpinning the exit funding target will be reviewed and updated on the advice of the Fund Actuary

Regardless of whether the residual liabilities are orphan liabilities or subsumed liabilities, the departing employer will be expected to make good the funding position disclosed by the exit valuation. In other words, the fact that liabilities may become subsumed liabilities does not remove the possibility of an exit payment being required from the outgoing employer.

However, where agreed between the parties the deficit (or any exit credit) may be transferred to the subsuming employer or guarantor, in which case it may be possible to simply transfer the former admission body's members and assets to the subsuming body, without needing to crystallise any deficit or pay an exit credit. This is the case with admission bodies admitted using London Borough of Southwark's admission policy, where no exit debt or credit is payable on exit.

If there are liabilities which cannot be recovered from the exiting employer or any bond/indemnity. These will fall to be met by the Fund as a whole (i.e. all other employers) unless there is a guarantor or successor body within the Fund.

At successive triennial Actuarial Valuations the Actuary will allocate assets within the Fund equal to the value of the orphan liabilities so that these liabilities are fully funded. This may require a notional reallocation of assets from the ongoing employers in the Fund.

Employers should be aware that advisory and other costs incurred by the Administering Authority in relation to the exit of an employer from the Fund will be re-charged to the exiting employer.

Regulation 64(4) of the Regulations provides the Administering Authority with a power to carry out valuations in respect of employers which are expected to exit at some point in the future, and for the Fund Actuary to certify revised contribution rates, between funding valuation dates.

The Administering Authority's overriding objective at all times in relation to employers is that, where possible, there is clarity over the Funding Target for that employer, and that contribution rates payable are appropriate for that Funding Target. However, this is not always possible as any date of exit of participation may be unknown (for example, participation may be assumed at present to be indefinite), and also because market conditions change daily.

The Administering Authority's general approach in this area is as follows:

- Where the date of exit is known, and is more than three years hence, or is unknown and participation is assumed to be indefinite, the Administering Authority will generally not deem it necessary to carry out an interim valuation.
- For Admission Bodies admitted under paragraph 1(d) of Part 3 Schedule 2 of the Regulations falling into the above category, the Administering Authority sees it as the responsibility of the relevant Scheme Employer to instruct it if an interim valuation is required. Such an exercise would be at the expense of the relevant Scheme Employer unless otherwise agreed.
- A material change in circumstances, such as the date of exit becoming known, material membership movements or material financial information coming to light may cause the Administering Authority to informally review the situation and subsequently formally request an interim valuation.
- For an employer whose participation is due to cease within the next three years, the Administering Authority will keep an eye on developments and may see fit to request an interim valuation at any time.

Notwithstanding the above guidelines, the Administering Authority reserves the right to request an interim valuation of any employer at any time if Regulation 64(4) applies.

Exit payments

Any deficit would normally be levied on the departing employer as a single capital payment although, the Administering Authority may, allow phased payments as permitted under Regulation 64B. The Administering Authority's policy in relation to the spreading of exit payments under Regulation 64B is set out below.

It is envisaged that spreading of exit payments will only be considered at the request of an employer. The Administering Authority will then engage/consult with the employer to consider its application and determine whether or not spreading the exit payment is appropriate and the terms which should apply.

In determining whether or not to permit an exit payment to be spread, the Administering Authority will consider factors including, but not limited to:

- the ability of the employer to make a single capital payment;

- whether any security is in place, including a charge over assets, bond, guarantee or other indemnity;
- whether the overall recovery to the Fund is likely to be higher if spreading the exit payment is permitted.

In determining the employer's ability to make a single payment the Administering Authority will seek actuarial, covenant or legal advice as required. Where the Administering Authority considers that the employer is financially able to make a single capital payment it will not normally be appropriate for the exit payment to be spread.

The employer will be required to provide details of its financial position, business plans and financial forecasts and such other information as required by the Administering Authority in order for it to make a decision on whether or not to permit the exit payment to be spread. This information must be provided within 2 months of request.

In determining the appropriate length of time for an exit payment to be spread, the Administering Authority will consider the affordability of the instalments using different spreading periods for the employer. The default spreading period will be three years but longer periods of up to ten years will be considered where the Administering Authority is satisfied that this doesn't pose undue risk to the Fund in relation to the employer's ability to continue to make payments over the period.

Whilst the Administering Authority's preference would be for an employer to request spreading of any exit payment in advance of the exit date, it is acknowledged that a final decision by the employer (and the Administering Authority) on whether this will be financially beneficial/appropriate may not be possible until the employer has exited. Exiting employers will be advised of the exit deficit and the spreading of any payment will only be considered at the request of the employer. Where there is a guarantor, the guarantor will also be consulted and any agreement to spread the exit deficit may be conditional on the guarantee continuing in force during the spreading period.

The amount of the instalments due under an exit deficit spreading agreement will generally be calculated as level quarterly amounts allowing for interest over the spreading period in line with the discount rate used to calculate the exit liabilities. Where the exit amount is significant, monthly payments may be required or the Administering Authority may require a higher initial payment with lower annual payments thereafter to reduce the risk to the Fund. Alternative payment arrangements may be made in exceptional circumstances as long as the Administering Authority is satisfied that they don't materially increase the risk to the Fund.

Where it has been agreed to spread an exit payment the Administering Authority will advise the employer in writing of the arrangement, including the spreading period; the annual payments due; interest rates applicable; other costs payable* and the responsibilities of the employer during the spreading period. Where a request to spread an exit payment has been denied the Administering Authority will advise the employer in writing and provide a brief explanation of the rationale for the decision.

*Employers will be asked to pay all advisory costs associated with the spreading agreement as well as calculation of the exit deficit (these costs will not be spread).

The Administering Authority will generally review spreading agreements as part of its preparation for each triennial valuation and will take actuarial, covenant, legal and other advice as considered necessary. In addition, employers will be expected to engage with the Administering Authority during the spreading period and adhere to the notifiable events framework as set out in the Pensions Administration Strategy. If the Administering Authority has reason to believe the employer's circumstances have changed such that a review of the spreading period (and hence the payment amounts) is appropriate, it will consult with the employer and a revised payment schedule may be implemented. Whilst this review may also consider the frequency of payments, it should be noted that it is not envisaged that any review will consider changes to the original exit amount nor interest rate applicable. An employer will be able to discharge its obligations under the spreading arrangement by paying off all future instalments at its discretion. The Administering Authority will seek actuarial advice in relation to whether or not there should be a discount for early payment given interest will have been added in line with the discount rate used for the exit valuation.

Suspension notices

Regulation 64(2A) permits the suspension of an employer's liability to make an exit payment for up to 3 years where the Administering Authority believes that the employer is likely to have one or more active members contributing to the Fund within the period specified in the suspension notice.

The Administering Authority considers that it is appropriate to exercise that discretion in relation to any employer where there is a reasonable expectation that a member will join in the near future (e.g. before the next triennial Actuarial Valuation). In that case, the Fund will advise the employer of the exit amount calculated by the Actuary and serve a written suspension notice on the employer.

Whilst under such a suspension notice, the employer must continue to pay any deficit payments certified to the Fund as if it were an ongoing employer and the actuary will recalculate any deficit and contributions due at the next Actuarial Valuation. If there are no new members by the time the suspension notice expires the Fund Actuary will carry out an exit valuation as at the date the suspension notice expires.

Deferred Debt Agreement (DDAs)

Regulation 64(7A) permits the Administering Authority to enter into a written agreement with an exiting Scheme employer for that employer to defer their obligation to make an exit payment and continue to make contributions at the secondary rate ("a deferred debt agreement").

The Administering Authority's policy in relation to the spreading of exit payments under Regulation 64(7A) is set out below.

In determining whether or not to enter into a DDA with an employer the Administering Authority will take into account the following factors, including but not limited to:

- the materiality of the employer and any exit deficit in terms of the Fund as a whole;
- the risk to the Fund of entering into a DDA, in terms of the likelihood of the employer failing before the DDA has ended, based on information supplied by the employer and supported by a financial risk assessment or more detailed covenant review carried out by the Fund Actuary or other covenant adviser

- the rationale for the employer requesting a DDA, particularly if the Administering Authority believes it would be able to make an immediate payment to cover the exit deficit; and
- whether an up-front payment will be made towards the deficit, and/or any security is, or can be put, in place, including a charge over assets, bond, guarantee or other indemnity, to reduce the risk to other employers.

Where it is expected that the employer's covenant may materially weaken over time the Administering Authority is very unlikely to consider entering into a DDA with that employer. Further, where an employer can demonstrably meet the exit payment in a single instalment, the Administering Authority would be unlikely to enter into a DDA unless it was clear that this wouldn't increase risk to the Fund, e.g. if the employer was fully taxpayer-backed and sufficient assurance was in place that all contributions due, including any residual deficit at the end of the DDA, would be met in full.

It is envisaged that DDAs will only be entered into at the request of an employer. In any case the Administering Authority will engage/consult with the employer to consider the application and determine whether or not a DDA is appropriate and the terms which should apply. As part of its application for a DDA the Administering Authority will require information from the employer to enable the Administering Authority to take a view on the employer's strength of covenant. Information will also be required on an ongoing basis to enable the employer's financial strength/covenant to be monitored. It is expected that DDAs will be monitored on an annual basis unless circumstances dictate otherwise. Monitoring may be more frequent as the end of the period of the DDA approaches

Employers should be aware that all advisory fees incurred by the Fund associated with a request for a DDA, whether or not this results in an agreement being entered into, and its ongoing monitoring, will be recharged to the employer.

The matters which the Administering Authority will reflect in a DDA, include:

- an undertaking by the employer to meet all requirements on Scheme employers, including payment of the secondary rate of contributions, but excluding the requirement to pay the primary rate of contributions;
- a provision for the DDA to remain in force for a specified period, which may be varied by agreement of the Administering Authority and the deferred employer;
- a provision that the DDA will terminate on the first date on which one of the following events occurs-
 - a) the deferred employer enrolls new active members;
 - b) the period specified, or as varied, elapses;
 - c) the take-over, amalgamation, insolvency, winding up or liquidation of the deferred employer;
 - d) the Administering Authority serves a notice on the deferred employer that it is reasonably satisfied that the deferred employer's ability to meet the contributions payable under the deferred debt arrangement has weakened materially or is likely to weaken materially in the next 12 months; or
 - e) the Fund Actuary assesses that the deferred employer has paid sufficient secondary contributions to cover the exit payment that would have been due if the employer had become an exiting employer on the calculation date.
- the responsibilities of the deferred employer
- the circumstances triggering a cessation of the arrangement leading to an exit payment (or credit) becoming payable, in addition to those set out in Regulation 64 (7E) and above.

The Administering Authority will monitor the funding position and risk/covenant associated with deferred employers on a regular basis. This will be at least triennially and most likely annually, but the frequency will depend on factors such as the size of the employer and any deficit and the materiality of movements in market conditions or the employer's membership.

The circumstances in which the Administering Authority may consider seeking to agree a variation to the length of the agreement under regulation 64(7D) include:

- where the exit deficit has reduced (increased) such that it is reasonable to reduce (extend) the length of the recovery period and associated period of the DDA assuming that, in the case of the latter, this does not materially increase the risk to the other employers/Fund
- where the deferred employer's business plans, staffing levels, finances or projected finances have changed significantly, but, in the case of a deterioration, the Administering Authority, having taken legal, actuarial, covenant or other advice as appropriate, does not consider that there is sufficient evidence that deferred employer's ability to meet the contributions payable under the DDA has weakened materially, or is likely to weaken materially in the next 12 months
- where the level of security available to the Fund has changed in relation to the DDA, as determined by the Administering Authority, taking legal, actuarial or other advice as appropriate

At each triennial valuation, or more frequently as required, the Administering Authority will carry out an analysis of the financial risk or covenant of the deferred employer, considering actuarial, covenant, legal and other advice as necessary.

Where supported by the analysis and considered necessary to protect the interests of all employers, the Administering Authority will serve notice on the deferred employer that the DDA will terminate on the grounds that it is reasonably satisfied that the deferred employer's ability to meet the contributions payable under the deferred debt arrangement has weakened materially, or is likely to weaken materially in the next 12 months, as set out under regulation 64(7E)(d).

Employers should be aware that all advisory fees incurred by the Fund associated with consideration of a DDA for an exiting employer, whether or not this results in a DDA being entered into, will be recharged to the employer. This will include actuarial, legal, covenant and other advice and the costs of monitoring the arrangement as well as the initial set up. Estimated costs can be provided on request. All fees must be paid up front and cannot be added to any secondary contributions payable under the DDA.

It is expected that employers will make a request to consider a DDA before they would otherwise have exited the Fund under Regulation 64(1) and that a DDA should be entered into within 3 months of that date. The employer should continue to make secondary contributions at the prevailing rate whilst the DDA is being considered unless the Administering Authority, having taken actuarial and other advice as appropriate, determines that increased contributions should be payable. In exceptional circumstances, e.g. where there has been a justifiable delay due to circumstances outside of the employer's control, and at the sole discretion of the Administering Authority, a DDA may be entered into more than 3 months after the exit date.

Deferred employers will be expected to engage with the Administering Authority during the period of the DDA and adhere to the notifiable events framework as set

out in the Pensions Administration Strategy as well as providing financial and other information on a regular basis. This will be necessary to support the effective monitoring of the arrangement and will be a requirement of the DDA.

Appeals

Any appeal against the administering authority's decision in relation to any of the matters in this section of the funding strategy must be made in writing within 6 months of being notified of the decision.

An appeal will require the employer to evidence one of the following:

- a deviation from the published policy or process by the administering authority, or
- any further information (or interpretation of information provided) which could influence the outcome, noting new evidence to be considered at the discretion of the Administering Authority.
